

STOOLS

SIMPLE WAYS TO KNOW THE
Correct Stool Height

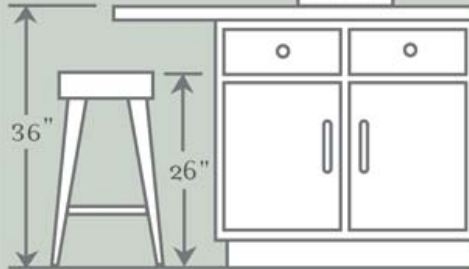

1

If your counter is the same height as a **kitchen table** you need 18 inch stools.

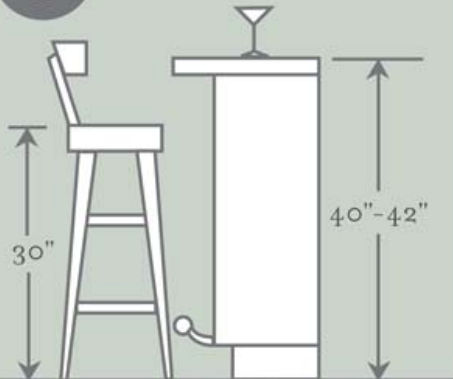

2

If your counter is the same height as your **kitchen sink** you need 26 inch stools.

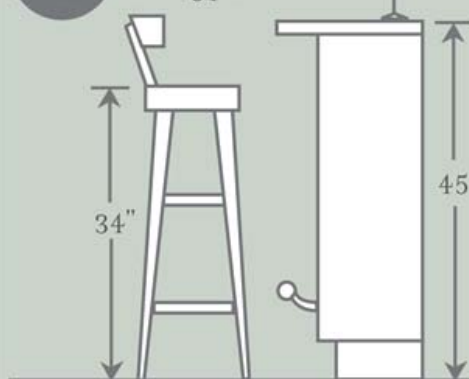

3

If your counter is **bar height** you need 30 inch stools.

4

If your counter is **super bar height** you need 34 inch stools.

OTHER TIPS

You'll need 10" to 12" from top of counter to top of cushion for leg room.

An average stool needs 24" of counter space.

Some stools are available in custom heights.

Most stool arms will fit under standard bar or kitchen counters.

Options vary by manufacturers. Exact heights may vary.
