

2004BUBBLER-W

Rock-Ola Bubbler Jukebox - Walnut

Base Price: \$9,500.00 [See Product Details](#)

Lead Time: 4-6 months

Details

Description

The Rock-Ola QB-8 Bubbler is one of the world's most instantly recognizable jukeboxes, taking its inspiration from the original Wurlitzer 1015, a classic symbol of American culture. It is a true authentic brand-new American jukebox. The QB-8 Bubbler gets its name from one of its most prominent features – the pockets of air that constantly float to the top of the eight brightly colored bubble tubes that line the machine.

The cabinet, shown here in walnut with visible wood grain, also comes in a choice of light oak or black. Alternatively, premium finishes are available in glossy piano white or glossy piano black.

Its slimline build allows it to fit comfortably in a room where space is at a premium; it is only 48cm (19inches) deep. It has the honor of having the best sound quality of any new jukebox, and is the ultimate storage system for all your favorite tracks, holding a terabyte of free space. With a 19" touchscreen monitor, you can sort through your extensive music collection, which the Music Center will then deliver using its 5 sophisticated internal speakers and QSC amplifier, to bring you perfect sound quality at both high and low volumes.

The more digital focus of the Rock-Ola Slimline Music Center jukebox means it is better suited than ever to mobile devices and sophisticated MP3 players, allowing you to download directly from a USB device, sync playlists to your device, or simply play your MP3 directly through the jukebox.

Specifications
