Shaft Maintenance Kit

The McDermott Shaft Maintenance Kit comes with everything you need to keep your shaft playing at peak performance.

Details

Specifications

It includes a Leather Conditioning Pad, McMagic Burnishing Papers, Ultra-Glide Conditioner and Renew Shaft Cleaner.

McMagic Burnishing Papers

Washable reusable shaft conditioning system for smoothing shaft. Cradle the sheet of sand paper around the shaft and stroke using a circular twisting motion. Avoid creating excess heat through friction. Proceed by using the finer grit sheets until the effect of the previous sheet is eliminated.

Ultra-Glide Shaft Conditioner

Seals wood pores in the shaft, eliminates built up dirt, moisture and oils. Promotes optimal feel for a more controlled stroke. Apply several drops to a clean dry cloth. Apply evenly on shaft. Buff for 30 seconds. Recommended to use after McMagic Micro Burnishing Papers.

Renew Shaft Cleaner

Eliminates drag due to dirt and oils on the shaft surface. Improves your stroke. Quick and easy to use to make your shaft and ferrule look and feel like new. Sprinkle Shaft Cleaner on a clean, damp cloth. Wipe down cue shaft. Repeat if necessary. Wipe off residue with clean, damp cloth. Use Renew Shaft Cleaner before McMagic

Micro Burnishing Papers. Then use Ultra-Glide Shaft Conditioner to seal and polish the shaft.

Leather Pad Shaft Conditioner

For smoothing and polishing shaft. Cradle leather pad shaft conditioner around the shaft and stroke using a circular twisting motion. Avoid creating excess heat through friction.
